

To provide a more skin-friendly environment it is important to use **breathable** incontinence products.

When the skin ages, it becomes weaker and more prone to problems. People with incontinence are especially vulnerable, as the skin in their intimate area is constantly exposed to moisture and irritants from urine and feces, which can lead to chafing and sores.

Seni offers a wide range of highly absorbent, breathable products as well as skin care products to help promote healthy skin.

SKIN CARE IN INCONTINENCE

Why choose specialist Seni Care skin care products?

seni
care

- **Specially created formula** of each product ensure excellent performance when used on dry, delicate skin which requires special care.
- **Natural ingredients** used to produce Seni Care skin care products make them safe to use even on the most sensitive skin.
- All of Seni Care products **have a slightly acidic pH which is best for the skin.**
- Seni Care products **make the protective layer of the skin stronger**, which makes it more immune to irritation.
- Because of the specially selected active ingredients and the **advanced technology** used to make Seni Care products, they are delicate, very effective and protect the hydrolipidic layer of the skin.

SKINCARE
in incontinence

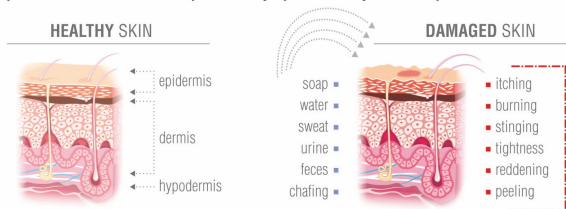

DELICATE CLEANSING + REGENERATION + EFFECTIVE PROTECTION

The skin is the largest organ of the human body.
Its surface is about 16-21,5 ft²

The skin protects the whole organism against harmful external factors like high temperature, dry air, bacteria, detergents, etc. Contact with these factors can leave the skin dry and irritated.

Proper care can reduce the unpleasant symptoms of dry skin and prevent new lesions.

Our skin to be healthy needs proper cleansing, nourishment to regenerate and protection. Seni Care products help to keep skin in good condition, especially for people with incontinence.

seni care Essential ingredients in Seni Care products:

Allantoin – accelerates the healing process, softens the epidermis, has a soothing and smoothing effect.

Arginine – helps to build new cells in the epidermis to speed up the recovery of chafed and damaged skin.

Calendula officinalis extract – promotes skin regeneration and provides soothing relief for damaged skin.

Canola oil – an emollient that forms a thin film on the surface of the skin and makes the external layers of the skin (epidermis) softer and more pliable by reducing excessive evaporation and water loss.

Linseed biocomplex – (extract and oil) is an occlusive and skin conditioning agent that nourishes and softens the skin.

Odour neutraliser – ingredient of natural origin that neutralise unpleasant odours such as urine and faeces.

Olive oil derivative – nourishes, smoothes the skin and prevents epidermis cracking.

Panthenol – a humectant that helps to hydrate the skin, thus smoothing it.

Sugar betaine – a natural substance that moisturises and reduces skin irritation.

Vitamin E – has anti-ageing properties, neutralises free radicals; it has smoothing, firming and lubricating properties.

DELICATE CLEANSING

Wet Wipes

KEY ACTIVE INGREDIENTS:

- VITAMINE E
- ALLANTOIN

10 pcs

80 pcs

- For sensitive skin
- Skin - friendly balanced pH

Effect

- cleansed and refreshed skin
- soft and optimally moisturised skin

KEY ACTIVE INGREDIENTS:

- ODOUR NEUTRALISER
- OLIVE OIL DERIVATIVE
- PANTHENOL
- LINSEED BIOCOMPLEX
- LACTIC ACID

500 ml

Tip

Shake well before use. The foam should be applied holding it upside down – this will allow you to effectively use all its content. After cleansing intimate areas, apply Seni Care protective cream with arginine.

Conditioning and washing body foam

Thanks to the gentle ingredients the active foam thoroughly cleanses the skin from impurities without disturbing its protective hydrolipidic mantle. **It is particularly effective for gentle cleansing of intimate areas in incontinence while changing the absorbent product.** Helps to maintain the right pH of the skin which is especially important in intimate parts. Contains an odour-absorbing ingredient of natural origin.

Effect

- clean, refreshed and healthy-looking skin
- soft and optimally moisturised skin
- neutralised odour

REGENERATION

Skin Care Oil

KEY ACTIVE INGREDIENTS:

- "CALENDULA OFFICINALIS" FLOWER EXTRACT
- VITAMIN E

150 ml

It effectively oils, smooths, and firms the skin. Nourishes the skin and protects it from over-drying. Enriched with *Calendula officinalis* flower extract, which stimulates the skin regeneration process, and with vitamin E, which slows down skin ageing. Spreads easily.

Tip

Use together with other Seni Care products as a complementary product in pressure ulcer prevention.

Effect

- soft skin pleasant to the touch
- alleviated symptoms of skin tension
- relaxed and soothed skin

EFFECTIVE PROTECTION

Body Care Cream with arginine

KEY ACTIVE INGREDIENTS:

- ODOUR-NEUTRALISER
- ARGININE
- ALLANTONIN
- LINSEED BIOCOMPLEX
- PANTHENOL
- SHEA BUTTER
- CANOLA OIL
- GRAPESEED OIL

200 ml

Protects skin from inflammation and irritation. This light cream absorbs easily, leaving a transparent protective film on the skin. Rich in intensely moisturising arginine which speeds up the epidermis regeneration. Enriched with nourishing and soothing linseed biocomplex and moisturising panthenol. **Contains the odour-neutraliser of natural origin.**

Effect

- reduced risk of chafes and bedsores
- the skin protected against irritating factors with a transparent film
- alleviated symptoms of dryness and tension of the skin

Tip

Gently spread the cream into the affected areas of the skin and leave to absorb.
